Section 401.02. **USE OF WATER OR SEWER SYSTEM RESTRICTED**

No person shall make or use any water or sewer service installation connected to the city water or sewer system except pursuant to application and permit as provided in this chapter. No person shall make or use any such installation contrary to the regulatory provisions of this chapter.

Section 401.03. **APPLICATION FOR SERVICE**

Subd. 1. Procedure. Application for a water or sewer service installation and for water service shall be made to the City Administrator on forms prescribed by the City Council and furnished by the city. By his signature, the applicant shall agree to conform to this chapter and to rules and regulations that may be established by the city as conditions for the use of water.

Subd. 2. Fees or deposit. Application for a service installation shall be made by the owner of the property to be served or by his agent. The applicant shall at the time of making application pay to the city the amount of the fees or deposit required for the installation of the service connection as provided in this chapter. When a water service connection has been installed, application for water service may be made either by the owner or his agent or by the tenant or occupant of the premises.

Section 401.04. **CHARGES FOR SERVICE CONNECTIONS**

Subd. 1. Permit and fee. No connection shall be made to the city water or sanitary sewer system without a permit received from the City Administrator. The fee for water and sewer connections shall be set by City Council resolutions. A copy of this schedule shall be in the appendix of this code. These fees shall be in addition to any fees required under Subdivision 2, 3, and 4.

Subd. 2. Connection fees. When a connection requires installation of a service line from the main to the property line, the applicant for a permit shall pay to the city an amount not less than the cost of making the necessary connections, taps, and installation of pipe and appurtenances to provide service to the property and the necessary street repairs.

Subd. 3. Certification. No permit shall be issued to connect with any water or sanitary sewer main unless the applicant certifies to the truth of one of the following or the payment required under Subdivision 4 is made:

1. That the lot or tract to be served has been assessed for the cost of construction the main with which the connection is made or that proceedings for levying such assessment have been or will be commenced in due course; or
2. That the cost of construction of the main has been paid by the developer or builder platting the lot or tract; or
3. That, if neither of the foregoing is true, a sum equal to the portion of the cost of constructing the main which would be assessable against the lot or parcel has been paid to the city.

Subd. 4. Additional connection fee. If no such certificate can be issued, the applicant shall pay an additional connection fee equal to the portion of the cost of construction of the main attributable to the property upon the same basis as any assessment previously levied against other property for the main. The determination shall be made by the City Council. If no such assessment has been levied, the assessable cost shall be determined upon the basis of the uniform charge which may have been or will be charged for similar connection with the main. The amount shall be determined on the basis of the total assessable cost of the main allocated on the basis of frontage. Where the assessable cost cannot be determined, the charge shall be set by the City Council based on front footage of the property to be served. In no event shall the connection charge made under this subdivision exceed the increase in value of the property attributable to the main.

Subd. 5. Notice and hearing. Before the City Council makes a final determination of the additional connection fee under Subdivision 4, (s)he shall submit a written notice to the applicant stating the amount of the proposed connection fee and the basis of its calculation. The notice shall also state that the applicant may, within ten days of receipt of the notice demand a hearing on the matter. If the applicant requests a hearing within that time, a hearing shall be held on the matter of the City Council at least one week after the date in which the request is made. If as a result of the hearing, the City Council finds that the proposed connection fee complies with the requirements of Subdivision 4, it shall so determine. If (s)he determines that the proposed fee is in excess of the amount that would have been assessed had the property been assessed for the main or in excess of the increase in market value attributable to construction of the main, (s)he shall make a determination of the proper amount of the fee within the limits specified in Subdivision 4. No connection shall be made without payment of the connection fee determined after the hearing or determined after the expiration of ten days from receipt of the notice when there has been no request within that time for a hearing.

Subd. 3. Delinquent accounts. All charges for water and sewer service shall be due on the monthly due date specified by the city for the respective account and shall be delinquent 15 days thereafter. The city shall endeavor to collect delinquent accounts promptly. In any case, where satisfactory arrangements for payment have not been made, the Public Works Department may, after the procedural requirements of Subdivision 4 have been complied with, discontinue service to the delinquent customer by shutting off the water at the stop box. When water service to any premises has been discontinued, service shall not be restored except upon the payment of all delinquent bills and a fee of \$20.00. Delinquent accounts shall be certified to the City Administrator who shall prepare an assessment roll each year providing for assessment of the delinquent amounts against the respective properties served. The assessment roll shall be delivered to the council for adoption on or before November 1 each year for certification to the county auditor for collection along with taxes. The resident will have until the 5th business day after receiving the certified letter to pay the utility bill in full. If the resident has not paid the utility bill in full before the 5th business day following receipt of the certified letter, the resident will have the water services shut off. To restore the resident's utilities, the resident must pay the utility bill in full including the current month, pay a reconnection fee of \$20.00 and a penalty of \$150.00. After the second disconnect the resident must pay an additional \$200.00 penalty.

This notice will typically occur 20 days after shut off of service. In any case this notice shall occur to inform the property owner of the process of applying the delinquent account to the property taxes of the affected property in December of the year in which the delinquency occurred.

Subd. 4. Procedure for shut off of service. Water shall not be shut off under Subdivision 3 or for a violation of rules and regulations affecting utility service until notice and an opportunity for a hearing have first been given the occupant of the premises involved. The notice shall be personally served or by registered mail to last known resident and shall state that if payment is not made before a day stated in the notice but not less than 10 days after the date on which the notice is given, the water supply to the premises will be shut off. The notice shall also state that the occupant may, before such date, demand a hearing on the matter, in which case the supply will not be cut off until after the hearing is held. If the customer requests a hearing before the date specified, a hearing shall be held on the matter by the City Council at least one week after the date on which the request is made. If as a result of the hearing, the City Council finds that the amount claimed to be owing is actually due and unpaid and that there is no legal reason why the water supply of the delinquent customer may not be shut off in accordance with the ordinance, the city may shut off the supply.

THAT SECTION 401.05 SUBDIVISION 4 IS HEREBY AMENDED, AS PASSED BY THE CITY COUNCIL ON MARCH 9, 1998, DOES NOT CHANGE IN CONTENT, BUT THE FOLLOWING IS ADDED TO DEFINE THE SCHEDULE/PROCEDURE FOR GIVING NOTICE OF SHUT OFF TO DELINQUENT ACCOUNTS.

4. The owners(s) of all houses, buildings, or properties used for human occupancy, employment, recreation or other purposes from which wastewater is discharged, and which is situated within the City and adjacent to any street, alley, or may in the future be located, a public sanitary sewer of the City, shall be required at the owner(s) expense to install a suitable service connection to the public sewer in accordance with provisions of this Code, within 90 days of the date said public sewer is operational, provided said public sewer is within 200 feet of the structure generating the wastewater. All future buildings constructed on property adjacent to the public sewer shall be required to immediately connect to the public sewer. If sewer connections are not made pursuant to this section, an official thirty (30) day notice shall be served instructing the affected property owner to made said connection.
5. In the event an owner shall fail to connect to a public sewer in compliance with a notice given under Article III, Section 4 of the Ordinance, the City must undertake to have said connection made and shall assess the cost thereof against the benefited property. Any person desiring a license to make a service connection with public sewers, shall apply in writing to the City Council with satisfactory evidence that the applicant or employer is trained, skilled and licensed in the State of Minnesota as a plumber. All applications shall be referred to the City Administrator. If approved by the City Administrator, such permit shall be issued upon the filing a bond as hereinafter provided.
16. No permit shall be issued to any person until a \$1,000 bond and/or certified check to the City, approved by the council, is filed with the City Administrator conditioned that the licensee will indemnify and save harmless the City from all suits, accidents, and damage that may arise by reason of any opening in any street, alley, or public ground, made by the licensee or by those in the licensee's employment for any purpose whatever, and that the licensee will replace and restore the street and alley over such opening to the condition existing prior to installations, adequately guard with barricades and lights and will keep and maintain the same to the satisfaction of the City Administrator, and shall conform in all respects to the rules and regulation of the Council relative thereto, and pay all fines that may be imposed on the licensee by law.

A toxic pollutant shall include but not be limited to any pollutant identified pursuant to Section 307 (a) of the Act.
4. The following described substances, materials, water, or wastes shall be limited in discharges to municipal systems to concentrations or quantities which will not harm either sewers, the wastewater treatment works treatment process or equipment, will not have an adverse effect on the receiving stream and/or soil, vegetation and ground water, or will not otherwise endanger lives, limb public property, or constitute nuisance. The Superintendent may set limitations lower than limitations established in the regulation below if, in his opinion, such more severe limitations are necessary to meet the above objectives. In forming his opinion as to the acceptability of wastes, the Superintendent will give consideration to such factors as the

quantity of subject waste in reaction to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, the City's NPDES and/or SDS permit, capacity of the sewage treatment plant, degree of treat ability of wastes in the sewage treatment plant, and other pertinent factors. The limitations or restrictions on materials or characteristics of waste or wastewaters discharged to the sanitary sewer which shall not be violated without approval of the Superintendent are as follows:

- a) Any wastewater having a temperature greater than 150 degree F (65.6 degrees C), or causing, individually or in combination with other wastewater, the in fluent at the wastewater treatment plant to have a temperature exceeding 104 degree F (40 degree C), or having heat in amounts which will inhibit biological activity in the wastewater treatment works resulting in interference therein.
- b) Any wastewater containing fat, wax, grease, or oils, whether emulsified or not, in excess of 100 mg/1 or containing substance which may solidify or become viscous at temperatures between 32 degree F and 150 degree F (0 degree C and 65.6 degrees C); and any wastewater containing oil and grease concentrations of mineral origin of greater than 100 mg/1 emulsified or not.

- d) Any garbage not properly shredded, as defined in Article I, Section 31. Garbage grinders may be connected to sanitary sewers from homes, hotels, institutions, restaurant, hospitals, catering establishments, or similar places where garbage originates from the preparation of food on the premises or when served by caterers.
- e) Any noxious or malodorous liquids, gases, or solids which either singly or by interaction with other wastes are capable of creating a public nuisance or hazard to life, or are sufficient to prevent entry into the sewers for their maintenance and repair.
- f) Any wastewater with objectionable color not removed in the treatment process, such as, but not limited to dye wastes and vegetable tanning solution.
- g) Non-contact cooling water or unpolluted storm, drainage, or ground water.
- h) Wastewater containing inert suspended solids (such as, but not limited to, fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate) in such quantities that would cause disruption with the wastewater disposal system.
- i) Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable state or federal regulations.
- j) Any water or wastes containing the following substances to such degree that any such material received in the composite wastewater at the wastewater treatment worked is detrimental to the treatment processes, adversely impacts land application, adversely affects the receiving waters, or is in violation of standards pursuant to Section 307(b) of the Act. The substances are arsenic, cadmium, copper, cyanide, lead, mercury, nickel,

silver, total chromium, zinc and phenolic compounds which cannot be removed by City's wastewater treatment system.

- k) Any wastewater which creates conditions at or near the wastewater disposal system which violates any statute, rule regulation, or ordinance of any regulatory agency, or state or federal regulatory body.
 - l) Any waters or wastes containing BOD5 or suspended solids of such character and quantity that unusual attention or expense is required to handle such materials at the wastewater treatment works, except as may be permitted by specific written agreement subject to the provisions of Section 17 of this Article.
5. If any waters or wastes are discharged or are proposed to be discharged to the public sewers which contain substances or possess the characteristics enumerated in Section 4 of this Article, and/or which in the judgment of the Superintendent, may have a deleterious effect upon the wastewater treatment facilities, processes, or equipment; receiving waters and/or soil, vegetation, and ground water; or which otherwise create a hazard to life or constitute a public nuisance, the City may:
- a) Reject the rates.
 - b) Require pretreatment to an acceptable condition for discharge to the public sewers, pursuant to Section 307 (b) of the Act and all addendums thereof.
 - c) Require control over the quantities and rates of discharge, and/or,
 - d) Require payment to cover the added costs of handling, treating, and disposing of wastes not covered by existing taxes or sewer service charges.

If the city permits the pretreatment or equalization of waste, flows, the design, installation, and maintenance of the facilities and equipment shall be made at the owners' expense, and shall be subject to the review and approval of the City pursuant to the requirements of the MPCA.

- 6. No user shall increase the use of process water or, in any manner, attempt to dilute a discharge as a partial or complete substitute for adequate treatment to achieve compliance with the limitations contained in Sections 3 and 4 of this Article, or contained in the National Categorical Pretreatment Standards or any state requirements.
- 7. Where pretreatment or flow equalizing facilities are provided or required for any waters or wastes, they shall be maintained at the expense of the owner(s).
- 8. Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing float able grease in excessive amounts, as specified in Section 4(b), any flammable wastes as specified in Section 3(a), sand or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of the type to be readily and easily accessible for cleaning and inspection. In the maintaining of these interceptors, the owner(s) shall be responsible for the proper removal and disposal of the captured materials by appropriate means and shall maintain a record of dates and means of disposal which are

subject to review by the Superintendent. Any removal and hauling of the collecting materials not performed by the owners' personnel must be performed by a currently licensed waste disposal firm.

9. Where required by the City, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable structure, or control manhole, with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of wastes. Such structure shall be accessible and safely located, and shall be constructed in accordance with plans approved by the City. The structure shall be installed by the owner at his expense and shall be maintained by the owner to be safe and accessible at all times.
10. The owner of any property serviced by a building sewer carrying industrial wastes may, at the direction of the City, be required to provide laboratory measurements, tests, or analysis of waters or wastes to illustrate compliance with this Ordinance and any special condition for discharge established by the City or regulatory agencies having jurisdiction over the discharge. The number, type, and frequency of sampling and laboratory analysis to be performed by the owner shall be as stipulated by the City. The industry must supply a complete analysis of the constituents of the wastewater discharge to assure that compliance with Federal, State, and local standards are being met. The owner shall report the results of measurements and laboratory analysis to the City at such times and in such manner as prescribed by the City. The owner shall bear the expense of all measurements, analysis, and reporting required by the City. At such times as deemed necessary, the City reserves the right to take measurements and samples for analysis by an independent laboratory.
11. All measurements, tests, and analysis of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest edition of Standard Methods for the Examination of Water and Wastewater, published by the American Public Health Association. Sampling methods, locations, times, duration and frequencies are to be determined on an individual basis subject to approval by the Superintendent.
12. Where required by the City, the owner of any property serviced by a sanitary sewer shall provide protection from an accidental discharge of prohibited materials or other substances regulated by this ordinance. Where necessary, facilities to prevent accidental discharges of prohibited materials shall be provided and maintained at the owners' expense. Detailed plans showing facilities and operating procedures to provide this protection shall be submitted to the Superintendent for review and approval prior to construction of the facility. Review and approval of such plans and operating procedures shall not relieve any user from the responsibility to modify the user's facility as necessary to meet the requirements of this ordinance. Users shall notify the Superintendent immediately upon having a slug or accidental discharge of substances of wastewater in violation of this ordinance to enable countermeasures to be taken by the Superintendent to minimize damage to the wastewater treatment works. Such notification will not relieve any user of any responsibility for any expense, loss or damage to the wastewater treatment system or treatment process, or for any fines imposed on the City on account thereof under any State or Federal law. Employees shall insure that all employees who may cause or discover such a discharge are advised of the emergency notification procedures.

13. No person, having charge of any building or other premises which drains into the public sewer, shall permit any substance or matter which may form a deposit or obstruction to flow or pass into the public sewer. Within thirty (30) days after receipt of written notice from the City, the owner shall install a suitable and sufficient catch basin or waste trap, or if one already exists, shall clean out, repair or alter the same, and perform such other work as the Superintendent may deem necessary. Upon the owners' refusal or neglect to install a catch basin or waste trap or to clean out, repair, or alter the same after the period of thirty (30) days, the Superintendent may cause such work to be completed at the expense of the owner or representative thereof.
14. Whenever any service connection becomes clogged, obstructed, broken or out of order, or detrimental to the use of the public sewer, or unfit for the purpose of drainage, the owner shall repair or cause such work to be done as the Superintendent may direct. Each day after seven (7) days that a person neglects or fails to so act shall constitute a separate violation of this section, and the Superintendent may then cause the work to be done, and recover from such owner or agent the expense thereof by an action in the name of the City.
15. The owner or operator of any motor vehicle washing or servicing facility shall provide and maintain in serviceable condition at all times, a catch basin or waste trap in the building drain system to prevent grease, oil, dirt or any mineral deposit from entering the public sewer system.
16. In addition to any penalties that may be imposed for violation of any provision of this chapter, the City may assess against any person the cost of repairing or restoring sewers or associated facilities damages as a result of the discharge of prohibited wastes by such person, and may collect such assessment as an additional charge for the use of the public sewer system or in any other manner deemed appropriate by the City.
17. No statement contained in this Article shall be construed as preventing any special agreement or arrangement between the City of Red Lake Falls and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment, subject to payment therefore by the industrial concern, providing that National Categorical Pretreatment Standards and the City's NPDES and/or State Disposal System Permit limitations are not violated.

The Superintendent or other duly appointed employee of the City, bearing proper credentials and identified shall be permitted to enter all properties for the purpose of inspection, observations, measurement, sampling, and testing pertinent to the discharges to the City's sewer system in accordance with the provisions of this ordinance.

2. The Superintendent or other duly authorized employees are authorized to obtain information concerning industrial processes which have a direct bearing on the type and source of discharge to the wastewater collection system. Section 406.02. **ESTABLISHMENT OF A SEWER SERVICE CHARGE SYSTEM**

Subd. 1. The City of Red Lake Falls hereby establishes a Sewer Service Charge System whereby all revenue collected from users of the Wastewater treatment facilities will be used to affect all expenditures incurred for annual operation, maintenance, and replacement and for debt service on capital expenditure incurred in constructing the wastewater treatment works.

Subd. 2. Each user shall pay its proportionate share of operation maintenance and replacement costs of the treatment works, based on the user’s proportionate contribution to the total wastewater loading from all users.

Subd. 3. Each user shall pay debt service charges to retire local capital costs as determined by the City Council.

Subd. 4. Sewer Service rates and changes to users of the wastewater treatment facility shall be determined and fixed in a “Sewer Service Charge System” developed according to the provisions of this Ordinance. The Sewer Service Charge System shall be adopted by resolution upon enactment of this ordinance.

Subd. 5. Revenues collected for Sewer Service shall be deposited in a separate fund known as “Utility Fund”. Income from revenues collected will be expended to offset the cost of Operation, Maintenance and equipment replacement for the facility and to retire the debt for capital expenditure.

Section 406.03. **DETERMINATION OF SEWER SERVICE CHARGES**

Subd. 1. Users of the City of Red Lake Falls wastewater treatment works shall be identified as belonging to one of the following classes:

- 1} Residential
- 2} Commercial
- 3} Industrial
- 4} Institutional
- 5} Governmental

The allocation of users to these categories for the purpose of assessing User Charges and Debt Service Charges shall be the responsibility of the City Administrator. Allocation of users to user classes shall be based on the substantive intent of the definitions of these classes contained herein.

Subd. 2. Each user shall pay Operation, Maintenance, and Replacement costs in proportion to the user’s proportionate contribution of wastewater flows and loadings to the treatment plant, with the minimum rate for loading of BOD and TSS being the rate established for concentrations of 250 mg/1 and 250 mg/1 TSS (i.e. Normal Domestic Strength Wastewater).

Those “Industrial Users” Discharging segregated ‘Normal Domestic Strength Wastewater’ only, can be classified as ‘Commercial Users’ for the purpose of rate determination.

Subd. 3. User Charges for Normal Domestic Strength Users

A. **CALCULATING BILLABLE FLOWS AND LOADINGS**

1. Measurement of Wastewater Volume:
2. The charges assessed residential users and those users of other classes discharging “Normal Domestic Strength Wastewater” shall be established proportionately according to billable wastewater volume. Billable wastewater volume shall be calculated as follows:
 - a. Residential Users:

Billable wastewater volume for residential users shall be calculated on the basis of metered water usage. The per monthly billable wastewater volume shall be equal to monthly metered water usage as averaged between the first and last months of the calendar year.

The City may require residential users to install water meters for the purpose of determining billable wastewater volume.

b. Non-Residential Users:

The billable wastewater volume of nonresidential users may be determined in the same manner as for residential users. Except that if the City determines that there are significant variations in the metered water usage of nonresidential users resulting in a proportionate increase in wastewater volume; then billable wastewater volume shall be:

1. Calculated on the basis of monthly metered water usage as recorded throughout the year, or (2) calculated on the basis of wastewater flow meters.

The City may, at its discretion, require nonresidential users to install such additional water meters of wastewater flow meters as may be necessary to determine billable wastewater volume.

2. Determination of Loadings from Metered Water Usage:

The billable amounts of BOD and TSS will be calculated from the volume of metered water usage, as determined above; where the billable quantities will be those attributable to wastewater at a concentration of 250 mg/l BOD and 250 mg/l TSS (i.e. "Normal Domestic Strength Wastewater").

B. DETERMINATION OF USER CHARGES FOR NORMAL DOMESTIC STRENGTH USERS:

User Charges for Normal Domestic Strength users shall be determined as follows:

1. Calculation of Unit Costs for Treatment of Normal Domestic Strength Wastewater:

$$Un = \frac{Comr}{Tbwv}$$

Where: Un = Unit cost for operation, Maintenance and Replacement to treat Normal Domestic Strength: in accordance with Articles III

Comr =(Total annual OM & R costs) – charge collected to treat concentrations Greater than Normal Domestic Strength; in accordance with Section 410.03, Subd. 4.

Tbwv = Total annual billable wastewater volume in kgal.

2. Calculation of User Charge for Normal Domestic Strength Wastewater:

$$Uc = UN \times bwv$$

Where: Uc = User Charge
Un = Unit cost for Operation, Maintenance
And Replacement to treat Normal
Domestic Strength, in \$/kgal.
bwv = Billable wastewater volume of a
particular user in kgal.

Subd. 4. User Charges for Users Discharging Wastes with Concentrations Greater than Normal Domestic Strength:

A. CALCULATING BILLABLE FLOWS AND LOADINGS

1. Calculation of Billable Flows

The billable amount of flow will be calculated from the volume of metered water usage, or at the discretion of the City, from the measurement of effluent flow at user's point of discharge. Measurements shall be according to a regular program prescribed by the city.

2. Calculation of Billable Loadings

The billable amounts of BOD and TSS will be calculated by the measurement of these wastes according to a program prescribed by the City in keeping with the latest edition of Standard Methods for the Examination of Water and Wastewater and in accordance with Chapter IV of the City Ordinance.

To insure compliance with 410.03 of this Ordinance, the following procedures shall be followed in determining average loadings per billing period for industrial users:

When a particular reading indicates concentration greater than or equal to Normal Domestic Strength, the actual reading shall be entered into the average for billing purposes.

When a particular reading indicates concentrations less than Normal Domestic Strength, Normal Domestic Strength shall be entered into the average for billing purposes.

B. DETERMINATION OF USER CHARGES FOR GREATER THAN NORMAL DOMESTIC STRENGTH USERS

1. Calculation of Unit Costs for Treatment of FLOW, BOD, TSS.

For purposes of determining proportionate surcharges, unit costs for treatment of FLOW, BOD, and TSS shall be determined and fixed annually in the Sewer Service Charge System according to the following procedure:

- a. Determine the Annual OM & R budget.
- b. Allocate total Annual OM & R costs to FLOW, BOD, and TSS proportionately; according to the costs of collection and treatment of FLOW, BOD, and TSS.
- c. Divide the OM & R costs attributable to FLOW, BOD, and TSS respectively, by the total annual billable volume and loadings of FLOW, BOD, and TSS to arrive at unit costs.

For purposes of determining Surcharges the following definitions of unit costs shall apply:

Uf = Unit cost for treatment of FLOW in \$/Kgal.
 Ubod = Unit cost for treatment of BOD in \$/lb.
 Utss = Unit cost for treatment of TSS in \$/lb.

Unit costs are developed from actual cost per kgal. Subsequent calculations of unit costs shall be according to the substantive intent of this SSCS.

2. Calculation of User Charges for treatment of wastewater with concentrations exceeding that of Normal Domestic Strength Wastewater:

$$Uc = [Un \times bwv] + [Ubod \times K \times bwv (Cbod - Nbod)] + [Utss \times K \times bwv (Ctss - Ntss)]$$

Uc = User Charge

Un = Unit cost for the treatment of Normal Domestic Strength Wastewater

bwv = Billable wastewater volume of a particular user in kgal.

Ubod = Unit cost for treatment of BOD in \$/lb.

K = .00834

Cbod = Users Concentration of BOD. in mg./l.

Nbod = 250 mg./l (Concentration of BOD in Normal Domestic Strength Wastes)

Utss = Unit cost for treatment of TSS in \$/lb.

Ctss = Users Concentration of TSS, in mg./l.

Ntss = 250 mg./l (concentration of TSS in Normal Domestic Strength Wastes)

Subd. 6. Determination of Sewer Service Charges.

The Sewer Service Charge for a particular connection shall be determined as follows:

$$SSC = Uc + Cc$$

Where: SSC = Sewer Service Charge.

Uc = User Charge.

Cc = Connection Charge for Debt Service.

Section 406.04. **UTILITY FUND**

Subd. 1. The City of Red Lake Falls hereby established a “Utility Fund” as an income fund to receive all revenues generated by the Utility Charge System, and all other income dedicated to the operation, maintenance, replacement and construction of the wastewater treatment works, including taxes, special charges, fees and assessments intended to retire construction debt.

Subd. 1. Application. The following land subdivision principles, standards and requirements will be applied by the Commission in evaluating plans for proposed subdivisions:

- b) Where literal compliance with the standards herein specified in clearly impractical, the council may modify or adjust the standards to permit reasonable utilization of property while securing substantial conformance with the objectives of these regulations. The procedure for a variation is stated in Article VI.

Subd. 2. Land Requirements. Land shall be suited to the purpose for which it is to be subdivided. No preliminary plan shall be approved if, considering the best interests of the public, the site is not suitable for plat and development purposes of the kind proposed by reason of potential flooding, swamp conditions, topography or soil limitations. Unless a plan is presented to indicate that the land can be made suitable, lots subject to flooding, and lots deemed uninhabitable because of topography or soils limitations shall not be approved by the Commission for residential occupancy, nor for such other uses as may increase danger to health, life or property or aggravate the hazard, but such land within a plat shall be set aside for such uses as shall not be approved by the Commission for residential occupancy, nor for such other uses as may danger to health, life or property or aggravate the hazard, but such land within a plat shall be set aside for such uses as shall not be endangered by periodic or occasional inundation or shall not produce unsatisfactory living conditions.

Land subject to hazards to life, health, or property shall not be subdivided for residential purposes until all such hazards have been eliminated or unless adequate safeguard against such hazards are provided by the subdivision plan.

Proposed subdivisions shall be coordinated with existing nearby villages or neighborhoods so that the community as a whole may develop harmoniously.

Subd. 3. Street System

Proposed streets shall be properly related to such street plans or parts therefore have been officially prepared and adopted by the city.

Proposed streets shall further conform to such county and state road and highway plans as have been prepared, adopted and/or filed as prescribed by law.

Streets shall be logically related to the topography so as to produce usable lots and reasonable grades. Grades shall not be in excess of 10% for collector roads or 15% for minor roads.

Access shall be given to all lots and portions of the tract in the subdivision, and to adjacent unsubdivided territory unless the topography clearly indicated that such connection is not feasible. Streets giving such access shall be improved to the limits of the subdivision. Reserved strips, and land locked areas shall not be created.

Minor streets shall be laid out to discourage their use by through traffic and thoroughfares shall be protected for use by through traffic by marginal access roads, lots served by an interior street or other means.

Half or partial streets will not be permitted, except where essential reasonable subdivision of a tract in conformance with the other requirements and standards of these regulations and where, in addition, satisfactory assurance for dedication of the remaining part of the street can be secured.

Where a tract to be subdivided borders an existing half, or partial street, the other part of the street shall be plotted within such tract.

Dead end streets shall be prohibited, except as stubs to permit future street extension into adjoining tracts, or when designed as cul-de-sac streets.

Private streets and reserve strips shall be prohibited when a variation is submitted and approved in accordance with Article VI.

Subd. 4. Cul-de-sac Streets.

Cul-de-sac streets, permanently designed as such shall not exceed 800 feet in length, except as variances are permitted by the Commission. Such a variance may be granted if it can be clearly shown that by reason of unfavorable land form, or the irregular shape of the plat from which the subdivision is being made, that a normal street pattern cannot be established or that land would be wasted by not granting such a variance.

Cul-de-sac streets shall be provided at the closed end with a turn around having a minimum radius to the outside edge of the finished road or curb line of not less than fifty (50) feet.

Unless future extension is clearly impractical or undesirable, the turn-around right-of-way shall be placed adjacent to a property line adjacent right-of-way of the same width as the street shall be carried to the property line in such a way as to a criminal nature extension of the street into the adjoining tract. At such times as such a street is extended, the overage created by the turn around outside the boundaries of the extended street shall revert in ownership to the property owner fronting on the temporary turn-around.

Subd. 5. Street design. Minimum widths for each type of public street or road shall be as follows:

Type of Street or Road	Right of Way Width
Major Thoroughfare	200 ft.
Secondary Thoroughfare	100 ft.
Collector Street or Road	80 ft.
Minor Street	66 ft.
Marginal Access Street and Cul-de-sac	50 ft.
Alley	20 ft.

Where a subdivision abuts or contains an existing road or street of inadequate width, sufficient additional width shall be provided to meet the above standards.

Additional right-of-way and roadway widths may be required to promote public safety and convenience when special conditions require it or to provide parking space in areas of intensive use.

Short extensions of existing streets or roads with lesser right-of-way and/or roadway widths than prescribed above may be permitted by variance in special cases.
